

DURGESH KUMAR

React Developer | AI-Assisted Development & Frontend Architecture

Ahmedabad, India | +91 9460092903 | durgeshsuthar01@gmail.com | linkedin.com/in/durgesh-kumar-a42827261

PROFESSIONAL SUMMARY

React Developer with 2+ years of experience building scalable SaaS admin panels, configurable dashboards, dynamic forms, RBAC-enabled applications, and API-driven enterprise interfaces. Hands-on experience creating an AI-powered code-generation agent for frontend and backend development, plus an npm CLI-based React starter template for quickly scaffolding reusable SaaS admin applications. Strong focus on component reuse, developer productivity, UI consistency, and maintainable frontend architecture.

CORE SKILLS

Frontend	React.js, JavaScript, TypeScript, HTML5, CSS3/SCSS, Tailwind CSS, Bootstrap, PrimeReact, responsive UI, UI/UX, Figma
Architecture & Data	JSON-driven forms, configurable dashboards, reusable component libraries, REST API integration, state management, RBAC, validation-rich forms
AI & Automation	AI agents, AI-assisted code generation, AI tools, prompt engineering, frontend/backend generation workflows, basic Python
Backend & Platforms	Node.js, Express.js, basic Spring Boot, MySQL/PostgreSQL, MQTT, WebSocket, AWS, Git, Agile development
Developer Tooling	npm package development, CLI tooling, React/Vite starter templates, reusable SaaS admin boilerplates

PROFESSIONAL EXPERIENCE

ReactJS Developer MSBC Group India Pvt. Ltd. - Ahmedabad, India	Dec 2025 - Present
- Built and adopted reusable components from the organization's internal React Toolkit, including configurable buttons, API handlers, JSON-driven forms, form engines, and data-driven dashboards. - Developed an AI-powered development agent that processes requirements and supports generation of both frontend and backend code, improving the flexibility and speed of application development workflows. - Created and maintained an npm CLI package that scaffolds a React + Vite SaaS admin-panel starter template with reusable architecture, routing, shared components, and internal-library readiness. - Implemented schema-based JSON form configurations and configurable dashboard patterns to reduce hardcoded UI logic and improve consistency across enterprise modules. - Contributed to Journeys.AI, a UK hotel-operations platform, delivering room-management workflows, RBAC, AI-assisted quiz/content features, weather alerts, and recurring calendar/event functionality. - Collaborated in Agile ceremonies and client discussions to clarify requirements, deliver iterative improvements, and support production-ready UI development.	
ReactJS Developer QPAIX Infitech Pvt. Ltd. - Ahmedabad, India	Jun 2024 - Nov 2025
- Developed responsive enterprise interfaces using React.js, React Bootstrap, and PrimeReact, integrated with backend REST APIs and complex business workflows. - Built SCADA and IoT device-management dashboards with real-time statistics, fuel-efficiency tracking, machine operations, and job-management views. - Created multi-step dynamic forms with validation, preview-before-submit behavior, reusable sidebars, and role-aware navigation. - Implemented interactive admin dashboards and custom 3D container-port tracking interfaces for operational visibility.	
ReactJS Developer Spectrics Solutions Pvt. Ltd. - Ahmedabad, India	Oct 2023 - Apr 2024
- Designed responsive React interfaces and reusable UI components using React Bootstrap and PrimeReact. - Integrated REST APIs, managed local and shared application state, and built admin dashboards with charts, tables, search, and filtering.	

SELECTED PROJECTS

AI-Powered Frontend & Backend Code Generation Agent

Technologies: Python, AI agents, requirement extraction, code-generation workflows, frontend/backend automation

- Created an AI-assisted development agent that converts user-story requirements into structured generation workflows for frontend and backend code.
- Designed the flow to support requirement extraction, planning, code generation, reusable examples, and CLI-based execution for developer-friendly usage.
- Focused on flexible generation patterns so the agent can handle dashboards, tabbed forms, CRUD modules, custom layouts, and reusable enterprise components.

React SaaS Admin Starter - npm CLI Package

Technologies: React, Vite, TypeScript, Tailwind CSS, npm CLI, reusable architecture

- Built a reusable React starter-template package that developers can scaffold through an npm CLI command.
- Included a SaaS-oriented admin-panel foundation with routing, layouts, shared components, configuration folders, services, hooks, utilities, and internal toolkit readiness.
- Designed the boilerplate to improve consistency, reduce repetitive setup, and make projects easier to run across development environments.

Journeys.AI - AI-Enabled Hotel Operations Platform

Technologies: ReactJS, internal React toolkit, REST APIs, JSON schema forms, RBAC, calendar engine, weather API, AI integration

- Built configurable, validation-rich forms and dashboards using JSON-based UI architecture and reusable toolkit components.
- Delivered room-management CRUD, role-based access, real-time weather alerts, AI-generated content, and a recurring event-management experience.
- Improved scalability and developer productivity by standardizing common UI and form patterns across modules.

Container Yard Management & Smart IoT Interfaces

Technologies: ReactJS, Java/Spring Boot, Node.js, MySQL, MQTT, WebSocket, AWS

- Developed interfaces for container tracking, operational status monitoring, search/filtering, and secure user workflows.
- Built real-time IoT dashboards for device data, alerts, environmental monitoring, and remote operational control.

EDUCATION

Bachelor of Computer Applications - Mohanlal Sukhadia University, Udaipur, Rajasthan

High School - Government Senior Secondary School, Swaroopganj, Sirohi, Rajasthan

CERTIFICATIONS & LANGUAGES

Certifications: HTML, CSS and JavaScript Course Certificate; ReactJS Internship Completion Certificate

Languages: English, Hindi
